

PhD positions: European Literatures and Gender from a Transnational Perspective

Mon, 01/23/2023 - 11:23

Gender and transnational perspectives in the approach to literary and cultural studies

European cultural production needs to be revisited in view of the complex social and political negotiations that are currently shaping European spaces and identities. EUTERPE, which is funded under Marie Skłodowska-Curie Actions, brings together research, training, and open access publications in interdisciplinary, transnational, gender focused literary studies. Nine early-stage-researchers (ESRs) will be trained and supervised. The research will be organised within four main areas involving transnational women's literature, translational genres, transnational women intellectuals, multilingualism and decolonising European pedagogies, and transnational literature and cultural production. The ESRs will co-produce an open-source Dictionary of Transnational Women's Literature in Europe and a Digital Catalogue and Podcast Library.

You can find more information in the [project webpage](http://gemmaerasmusmundus.eu/).

The screenshot shows the EUTERPE project webpage. At the top, there is a header with the European Commission logo, the CORDIS EU research results logo, and a search bar. Below the header, the title "European Literatures and Gender from a Transnational Perspective" is displayed. The main content area is divided into two columns. The left column, titled "Project description", contains a brief overview of the project, mentioning its funding under Marie Skłodowska-Curie Actions and its focus on interdisciplinary, transnational, gender-focused literary studies. It also lists the four main research areas: transnational women's literature, translational genres, transnational women intellectuals, and multilingualism and decolonising European pedagogies. The right column, titled "Project information", provides details about the grant agreement (ID: 101073012), the start date (1 October 2022), the end date (30 September 2025), and the funding source (Marie Skłodowska-Curie Actions (MSCA)). It also shows the total cost (€ 2 316,333.60) and the EU contribution (€ 2 316,333.60). A small circular progress indicator is visible next to the funding information.
